

Round 1: “Pop Culture”

Beginner Division

Name: _____

B.1.1	Sudoku	30 points	B.1.10	TomTom	30 points
B.1.2	Sudoku	105 points	B.1.11	TomTom	30 points
B.1.3	Sudoku	170 points	B.1.12	TomTom	130 points
B.1.4	Numberlink	10 points	B.1.13	Battleships	10 points
B.1.5	Numberlink	40 points	B.1.14	Battleships	25 points
B.1.6	Numberlink	120 points	B.1.15	Battleships	65 points
B.1.7	Domino Hunt	20 points			
B.1.8	Domino Hunt	80 points			
B.1.9	Domino Hunt	135 points			

Total: 1000 points

B.1.1 – B.1.3: Sudoku

Insert a number from 1 to 9 (1 to 6 in the first puzzle) so that no number repeats in any row, column, or box.

Puzzle B.1.1 (30 points)

	4	1	3		
	3			6	
	5			3	
		3	1	2	

Puzzle B.1.2 (105 points)

	1	2	3	4	5			
			1					6
			8					4
2						4	1	5
5								2
9	4	8						7
8					2			
7					3			
			5	9	7	8	2	

Puzzle B.1.3 (170 points)

					1			
		9	8		2	3		
	7	1				4	5	
8	4						6	
	6						4	1
	2	3				5	8	
		8	6		3	7		
			4					

B.1.4 – B.1.6: Numberlink

Draw non-intersecting paths through the centers of some cells, each connecting one clue to its equal counterpart.

(Note: all cells will be used in the final solutions to these puzzles.)

B.1.4 – B.1.6: Numberlink

Draw non-intersecting paths through the centers of some cells, each connecting one clue to its equal counterpart.

(Note: all cells will be used in the final solutions to these puzzles.)

B.1.4 – B.1.6: Numberlink

Draw non-intersecting paths through the centers of some cells, each connecting one clue to its equal counterpart.

(Note: all cells will be used in the final solutions to these puzzles.)

Puzzle B.1.5 (40 points)

Puzzle B.1.4 (10 points)

1	2	3					
						4	
		4	5	6			
						6	
	1						
			7	2	8		
	8						
					7	5	3

[illegible]

Puzzle B.1.6 (120 points)

[illegible]

B.1.7 – B.1.9: Domino Hunt

Divide the grid into dominoes so that each domino in the indicated set is used exactly as many times as it appears. The orientation of the digits does not matter.

Puzzle B.1.7 (20 points)

2	1	1	2	4	4
3	3	3	3	4	5
1	3	2	2	1	4
5	4	4	2	2	1
3	5	5	1	5	5

6 | 6

B.1.10 - B.1.12: TomTom

Place a number from 1 to N into each cell so that each row and column contains every number from that range with no repeats, where N is the side length of the grid. A clue represents the value obtained by applying an operation iteratively on the numbers in the region the clue is in. If no operation is given, it may be any of $+$, $-$, $\times$, or $\div$. Subtraction and division in regions with more than two numbers are handled by taking the largest number and subtracting/dividing all the others.

Puzzle B.1.10 (30 points)

		9×		
11+				
			5+	
	15×			

Puzzle B.1.11 (30 points)

8×		6×	8+	
	9+			
		6+		8×
8+				

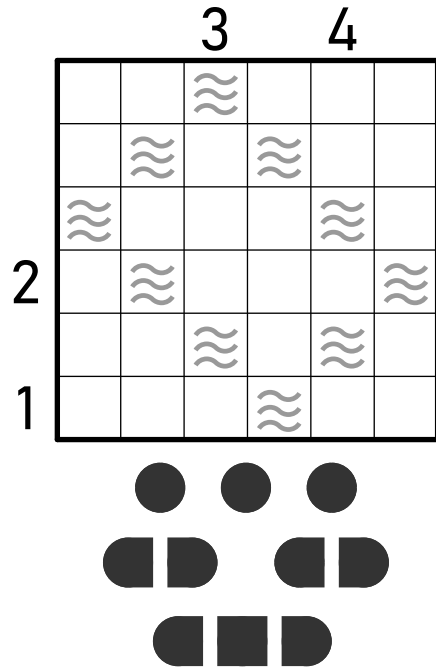

Puzzle B.1.12 (130 points)

8				8
8				
8		8		
		8		

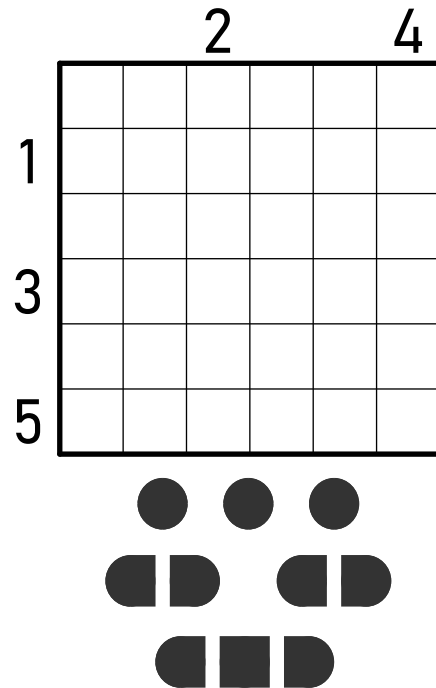

B.1.13 - B.1.15: Battleships

Place the given fleet of ships into the grid so that no two ships are touching, not even diagonally. Rotating ships is permitted. A clue outside the grid indicates the number of cells in the corresponding row or column that are occupied by ships. Cells with waves cannot be occupied by a ship. A given ship segment must be used as the part of a ship that its shape represents.

Puzzle B.1.13 (10 points)

Puzzle B.1.14 (25 points)

Puzzle B.1.15
(65 points)
