B.3.9	Yajilin	65 points			

Total: 1000 points

B.3.1 - B.3.3: Tapa

Shade some cells so that all shaded cells form one orthogonally connected area and no 2x2 region is entirely shaded. Clues cannot be shaded, and represent the lengths of the blocks of consecutive shaded cells in the (up to) eight cells surrounding the clue.

Puzzle B.3.3 (195 points)

[illegible]

B.3.4 - B.3.6: Kurotto

Shade some cells so that clues represent the total size of the orthogonally connected areas of shaded cells that share an edge with the clue. Clued cells cannot be shaded.

Puzzle B.3.4 (10 points)

Puzzle B.3.5 (90 points)

Puzzle B.3.6
(115 points)

B.3.7 - B.3.9: Yajilin

Shade some cells so that no two shaded cells are orthogonally adjacent and draw a non-intersecting loop through the centers of all the remaining empty cells. Clues cannot be shaded, and represent the number of shaded cells in a straight line in the indicated direction.

Puzzle B.3.8 (45 points)

Puzzle B.3.7 (20 points)

Puzzle B.3.9
(65 points)

B.3.10 - B.3.12 : Easy As

Place letters from the range given outside the grid into some cells so that each row and column contains each letter once. A clue outside the grid represents the first letter seen in the corresponding row or column from that direction.

B.3.13 – B.3.15: Balance Loop

Draw a non-intersecting loop through the centers of some cells that passes through every circle. The straight line segments coming out of a white circle must have equal length, while the straight line segments coming out of a black circle must have different lengths. A clue in a circle represents the sum of the lengths of these two line segments.
