

Round 4: Grab Bag

Advanced Division

Name: _____

A.4.1	Hanami	10 points	A.4.10	Voxas	15 points
A.4.2	Hanami	55 points	A.4.11	Voxas	40 points
A.4.3	Hanami	150 points	A.4.12	Voxas	115 points
A.4.4	Dominion	10 points	A.4.13	Nurikabe Loop	45 points
A.4.5	Dominion	25 points	A.4.14	Nurikabe Loop	60 points
A.4.6	Dominion	135 points	A.4.15	Nurikabe Loop	160 points
A.4.7	Stitches	30 points			
A.4.8	Stitches	40 points			
A.4.9	Stitches	110 points			

Total: 1000 points

A.4.1 - A.4.3: Hanami

Draw some rectangles in the grid. Rectangles cannot overlap each other or white circles. Every rectangle must contain exactly one black circle, whose number represents the area of the rectangle. The cells not used by any rectangle must form a single connected area.

Puzzle A.4.1 (10 points)

Puzzle A.4.2 (55 points)

Puzzle A.4.3
(150 points)

A.4.4 - A.4.6: Dominion

Shade some dominoes of cells to divide the grid into unshaded areas. Shaded dominoes may not touch orthogonally. Clues cannot be shaded, and each orthogonally connected area of unshaded cells contains exactly one type of clue, and all instances of it.

Puzzle A.4.4 (10 points)

					B					
B		D				A		A		
										C
B						D				

A.4.7 - A.4.9: Stitches

Draw some lines of length 1 ("stitches") in the grid. Each cell contains at most one stitch. All stitches must cross a region border, "connecting" the two regions. Every pair of regions sharing at least one edge must have exactly N stitches connecting them, where N is specified next to the grid. Clues outside the grid indicate how many cells are used by stitches in the corresponding row/column.

Puzzle A.4.7 (30 points)

Puzzle A.4.8 (40 points)

Puzzle A.4.9
(110 points)

A.4.10 - A.4.12: Voxas

Divide the grid into 1x2 and 1x3 regions. Borders must separate two different regions. Borders with white dots separate regions with the same size and orientation. Borders with black dots separate regions with neither the same size nor the same orientation. Borders with grey dots separate regions with either the same size or the same orientation, but not both.

Puzzle A.4.11 (40 points)

Puzzle A.4.10 (15 points)

Puzzle A.4.12
(115 points)

A.4.13 - A.4.15: Nurikabe Loop

Draw a non-intersecting loop through the centers of some empty cells. Every orthogonally connected area of cells not visited by the loop contains exactly one clue, the value of which represents the size of the area.

Puzzle A.4.13 (45 points)

[illegible]

Puzzle A.4.14 (60 points)

1									3
