

2026 LPO Team Round

This round consists of a series of Kurotto puzzles with extra variants. There are five variants, labeled A through E. Each letter introduces an additional clue type. There are no “global” variants (i.e. variants which apply to the entire grid).

Each variant contains three solo puzzles. The first is designed to introduce the variant, while the second and third demonstrate puzzles using this variant. You must determine the ruleset associated with each variant. Feel free to use the fact that all puzzles must solve uniquely!

The next five pages contain puzzles which mash two variants together. The letters for each variant are given. Some puzzles may be harder than others. Feel free to skip around! The final puzzle is a large grid combining all five clue types.

After fifteen minutes, you will have the option to receive clarification on any ruleset.

Have fun!!
